

LHR

UT AUSTIN

Longhorn Racing

Letter from our President

Dear Friend,

On behalf of the Longhorn Racing family at The University of Texas at Austin, I am reaching out to you for support during our 2025-2026 build cycle and beyond. In 1980, our organization started the first Formula SAE collegiate design competition. Today, Longhorn Racing is the largest technical student organization on the Forty Acres, dedicated to building strong and skilled students through their experiences with our three vehicle design teams. Through Longhorn Racing, students gain invaluable hands-on experience in engineering, design, and manufacturing, alongside crucial soft skills like leadership and teamwork. I truly mean it when I say that your partnership is invaluable to our success.

Enclosed within this package, you will find detailed information about our organization and the various partnership opportunities available. If you have any questions or want to learn more, please do not hesitate to reach out. I am always available to discuss how we can tailor a partnership to align with your organization's goals and values.

Thank you for your time, and we look forward to working with you for years to come!

Hook 'em,

Navya Agrawal

President | Longhorn Racing

B.S. Computer Science and Robotics | May 2026

Our Design Teams

Formula SAE Internal Combustion

Our team upholds the legacy of our organization's origins in IC. With each build, we focus on advancing towards the future by implementing mechanical designs for manufacturing, high level vehicle simulation/modeling, and increasing volumetric/thermal efficiency for internal combustion engines.

Formula SAE Electric

Our Electric team leverages insights from the current market, which inspired its inception in 2016. We are fueled by a drive to innovate and push boundaries. Though the workings of the team are rooted in reliable methods of design and manufacturing, each yearly vehicle is rich with developments in our materials, designs, and processes.

Solar Vehicle Team

We are a multidisciplinary team striving to build the fastest, most efficient solar powered vehicle. Our team aims to lead the future markets in the increasingly growing solar-power industry. To seize this opportunity, our solar team remains dedicated to innovation as we improve our endurance, efficiency, and custom electronics.

Our Journey

Past - Competition

Last summer, the Combustion team competed at FSAE Michigan and placed 11th in design and completed all events. The Electric team competed at FSAE EV Michigan and had the lightest battery at competition, as well as a revolutionary brake package that allows full regen. The Solar team competed in FSGP and fielded their first fully functional car since 2013.

Present - Organization Growth

In the 2024-2025 academic year, we saw a large growth in each design team. During our initial recruiting week, we had over 1500 applications and accepted over 180 students, making Longhorn Racing the largest technical organization on UT's campus. However, as our teams grow, so do our needs for tools and materials, especially as our design teams explore new materials and manufacturing techniques.

Future - Ambition

This upcoming season, we will continue to expand our goals. Our Combustion team is pursuing new ways to predict and optimize our performance via a custom lap time simulator. The Electric team's headline vehicle goal is to drive 100 miles before Unveiling, reflecting the importance of testing and tuning for competition performance. The Solar team's goal is to complete manufacturing of our first new vehicle design in over four years—completing the steel frame and composite aeroshell—for an ultimate goal of powered run before June's competition. We plan on winning national championships this season and need your support in every way!

Promoting Safety and Inclusivity

Safety

At LHR, safety is our topmost priority. We have implemented comprehensive safety initiatives to ensure a secure working environment for all members. One significant measure is the development of detailed Standard Operating Procedures (SOPs) tailored to the diverse array of environments in which we operate. These SOPs provide clear guidelines and protocols to follow, guaranteeing that our teams are equipped to handle any situation safely and efficiently. By prioritizing safety, we uphold the well-being of our members and create a culture where everyone can work confidently and with peace of mind.

Diversity

LHR prioritizes inclusivity and equal representation through active recruitment from organizations like AWIM and SWE, ensuring a diverse talent pool. Notably, our team boasts a higher percentage of women compared to the Electrical and Computer Engineering (ECE) department. Moreover, we are delighted to announce that our Electric team recently won the Everybody in Campaign award during this year's competition, recognizing our efforts in fostering a diverse and inclusive work environment.

Outreach

Our team is dedicated to impactful STEM outreach. We actively participate in local initiatives like ALS Fundraiser with the Busby Foundation and Girl Day at UT-Austin. We take cars to schools, engaging students with interactive engineering activities. Additionally, we host events with corporate partners to promote STEM education, empowering students to pursue their passions. Through outreach, we aim to create a more inclusive STEM industry and nurture a passion for learning among youth.

We Need Your Support

Nearly all of Longhorn Racing's budget comes from corporate supporters and individual donors. Upon our receiving your contribution, you will be sent a letter of thanks that will contain all necessary information for your tax records, as well as an invitation to the unveiling of our new vehicles when the details are finalized.

If you would like to learn more about our design teams, we encourage you to visit longhornracing.org and check out our Instagram ([@longhornracing](https://www.instagram.com/longhornracing)) and [LinkedIn](#) page for more information. If you are interested in making a donation to Longhorn Racing, please contact us or donate online at tinyurl.com/LHRdonate. If you would like to donate via check, please mail to:
